- Laravel

ABOUT ME

Hello, name is Yahya Ayash Abdul Aziz, a 12th-grade student majoring in Software Engineering (RPL) with a strong interest in becoming a Junior Frontend Developer.

EXPERIENCE

Restorant management
fullstack developer
JUNI 2024

Developed a web-based restaurant management system to streamline daily operations, designed to separate admin and staff functionalities with secure role-based access.

Sisfo Sarpras
fullstack developer
juni 2025

- Developed a web-based application for facility and infrastructure management at an educational institution using PHP with Laravel.
- Designed and implemented CRUD features for item categories, item data, borrowing, and returns.
- Implemented a role-based access control system, where admins and users have different access rights:
- Admins can manage category and item data.
- Users can borrow and return items.

SERTIFICATION

Uji Level Restorant Management
Uji Level SIsfo Sarpras
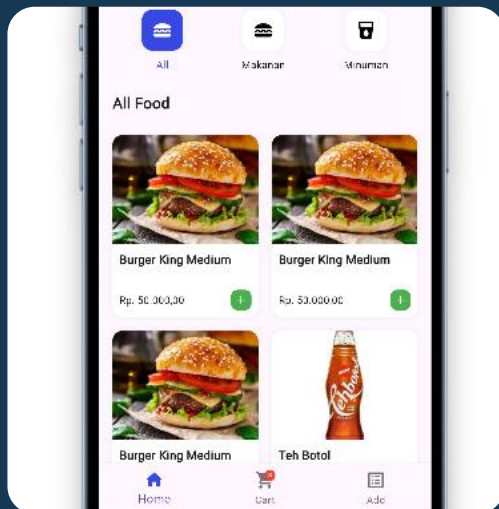

PORTOFOLIO PROJECT

Yahya Ayash Abdul Aziz

SISFO SARPRAS

Facilities and Infrastructure Information System. This is an information system designed to manage and monitor data related to facilities and infrastructure.
